

PRO C400

High Speed Coin Sorting & Counting

Designed for efficiency, the PRO C400 counts and sorts up to 950 coins per minute, turning piles of loose change into neatly organized totals in no time.

Its large-capacity hopper holds up to 1,300 quarters, so you can load more and refill less, while durable coin bins accommodate up to 400 coins each for uninterrupted operation.

Stay in control with the clear LED display, which displays both the count and total value for every denomination. Set custom batch amounts to streamline rolls, deposits, or cash drawer prep with ease.

Specifications
