

imageFORMULA RP10 THERMAL RECEIPT PRINTER

The RP10 thermal receipt printer uses the latest printing technology to help increase productivity and efficiency at any teller station, all while lowering costs. When combined with the Canon imageFORMULA check scanners,* the optional RP10 thermal receipt printer is well suited for financial transactions with its space-saving design, high-speed thermal printing, and minimal noise output. The RP10 thermal receipt printer also features front-load/front-exit convenience for superior teller ergonomics. Ultimately, this printer provides an efficient and inexpensive solution to streamline the many activities involved in teller station/point-of-service operations.

SPACE-SAVING, MULTIFUNCTION DESIGN

The design of the RP10 thermal receipt printer allows it to serve as a platform, enabling the CR-120/150 (and certain other) check scanners* to stack neatly on top in a single, small footprint, saving valuable workspace and providing more room for teller operations. This design also lends itself to more efficient cable management. And when combined, the RP10 thermal receipt printer and the CR-120/150 scanners* work in tandem as a multifunctional device for teller operations. They consolidate the functions of many peripherals found at the teller station, including a card scanner or magnetic stripe reader,** into one device to help further reduce counter space requirements and help improve efficiency.

HIGH SPEED, WITH MINIMAL NOISE

The RP10 thermal receipt printer uses the latest in thermal technology, which enables it to print at exceptionally high speeds, producing receipts at up to 5.9 inches per second. Not only does this printer's high-speed output help reduce transaction times, but it also prints with minimal noise, unlike traditional dot matrix printers. With quiet and fast printing, the RP10 thermal receipt printer is an ideal addition to any teller station to help improve productivity and customer satisfaction.

Receipt Printer.

LOW RUNNING COSTS

Since it uses thermal technology, the RP10 thermal receipt printer is easy to use and maintain. It does not require ongoing replacement of certain consumables such as ink cartridges or printer ribbons, unlike traditional ink printers. Additionally, this printer is conveniently compatible with standard thermal paper and does not require any special paper or supplies. Plus, since thermal printing requires fewer moving parts than traditional dot matrix printers, the RP10 thermal receipt printer is very reliable. This all contributes to lower running costs, making it exceptionally more affordable than traditional printing method over the long-term and well-suited for teller station environments that produce a high volume of receipts.

CUSTOMIZES RECEIPTS[▲]

The RP10 thermal receipt printer can create custom receipts using the included OPOS driver. These receipts can incorporate important business information, including text, images, watermarks, logos, and any other additional patterns and designs. And the thermal technology can deliver this information through sharper and more consistent print images than traditional printing methods.

ENVIRONMENT IN MIND

The RP10 thermal receipt printer meets ENERGY STAR[®] guidelines for energy efficiency and complies with the EU WEEE directive for the reduction of hazardous substances and waste products.

SPECIFICATIONS

Print Method:	Thermal Line-dot Printing
Printing Direction:	Unidirectional with Friction Feed
Dot Density:	8 dot/mm
Paper Feeding Pitch:	0.125 mm
Cutter Method:	Full Cut/ Partial Cut
Max. Print Width:	About 2.8" (72 mm)
Print Speed:	Up to 5.9"/sec (150 mm/sec)
Interface:	High Speed USB 2.0
Operating Temperature:	0° to 40° C (32° to 104° F)
Operating Humidity:	30% to 85% RH (No Dew Condensation)
Storage Temperature:	-30° to 50° C (-21° to 122° F)
Storage Humidity:	10% to 90% RH (No Dew Condensation)
Dimensions:	5.31" (H) x 6.7" (W) x 11" (D)
Weight:	3.5 lb.
Power Supply:	AC 100-240 V 50/60 Hz
Power Consumption:	Printing: Maximum 55 W Sleep Mode 0.7 W With Power Switch Off: 0.4 W
Bundled Software:	Printer Driver, OPOS Driver
Compatible Scanners:	Canon imageFORMULA CR-120, CR-150, CR-120 MSR, CR-150 MSR
Item Number:	1732C004AA

Paper Specifications

Type:	Thermal Roll Paper
Width:	80+0, -1 mm
Outer Diameter:	Up to 083 mm
Inner Diameter :	08 mm or More
Thickness:	60 to 100 mm

* CR-120/CR-150 sold separately.

** Magnetic Swipe Reader available only with purchase of CR-120 MSR or CR-150 MSR.

▲ Receipts can be customized via OPOS interface.
