# EverneXt

## Branch Transformation just got more intelligent

Built on decades of experience as a leader in check capture, EverneXt is the **premium choice for Financial Institutions,** designed to support branch transformation and capable of deeply transforming their way of dealing with deposits.

**UniLink**™

# High performance
# in demanding environments

**EverneXt** was specifically designed to address the most common barriers in teller capture (environment, operator, and document quality issues), resulting in unparalleled levels of usability and productivity – now available with Panini's unique intelligent architecture, which allows:

**Professional check capture technology** both in wired and wireless environments

**"Branch of the Future"** use with roaming bankers sharing scanners in an open setting

**API-free, OS-agnostic integration** to a variety of host devices via HTTPS protocol

## Gets the job done for you

No scanner on the market packs a wider range of advanced capabilities in such a compact footprint and with a more stylish design: ergonomics, impeccable paper handling, high speed, superior printing capabilities, accessibility, and compatibility with a wide range of use cases, Focus on your Customers while **EverneXt** reliably gets the job done for you.

*"The selection of Everest technology reduces the complexity of integration and provides the infrastructure for future use of Wi-Fi technology."*

**(a Texas Financial Institution customer)**

**PANINI**®

# Intelligent
## multifunctionality
# at its best

## Sleek and Ergonomic Design

With swing-open covers allowing complete visibility to device interior for cleaning, jam removal and ink cartridge replacement

**Dimensions:**
155 mm – 6.1" (**width**)
227 mm 8.9" (**length**)
213 mm – 8.4" (**height**)
**Weight:** ~2.2 Kg – ~4.85 lb

## Connectivity

EverneXt works with a variety of hosts (PC, Mac, smartphone, tablet and more) using different Operating Systems and with a number of interfaces (USB RNDIS, direct network connection via Ethernet or Wi-Fi) via HTTPS secure protocol, with no need to install and maintain APIs or drivers; alternatively, customers using an API-based application written for legacy scanners can choose **Hybrid mode** and make their installation future-proof

### 1 Feeding and Throughput

Autofeeder holding up to 100 cheques and including our patented auto-alignment mechanism to eliminate the need to jog items, creating dramatic savings related to rework and errors; scalable throughput of 100 or 160 documents per minute (dpm)

### 2 Accurate MICR and Superior Imaging

Advanced MICR reading algorithms with optical correction for optimal decoding accuracy; superior grayscale and color duplex scanning, up to 300 dpi, at an impressive
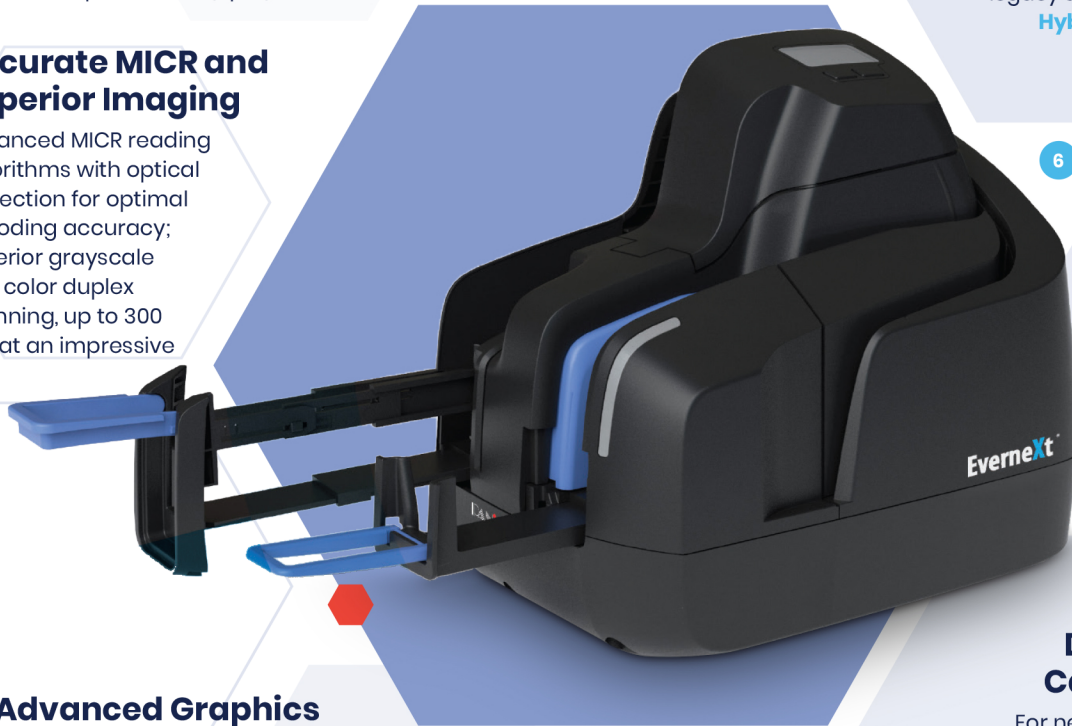

### 6 LCD Display

Ready to promptly advise in case of any anomaly and to inform you on connectivity status, historical data, ink jet

### 5 Full color, Dual-Sided ID Card Scanning

For new account creation and customer identity verification processes

### 3 Advanced Graphics Printer (AGP)

Capable of rich check endorsement with up to 14 lines of text and graphic images, customer receipts on cut sheets, validations and more; alternatively, Panini's Stackable Thermal Printer fits comfortably underneath the scanner within its footprint

### 4 Pocketing

Exit pocket holding up to 100 checks, in the order in which they were processed; integrated exception pocket which can efficiently manage foreign, wrongly positioned or other rejected items on the fly
