

The Topaz[®] SignatureGem[®] LCD 4x5 MSR is one of Topaz's largest, rugged, advanced electronic signature capture pad with an attached MSR and bright QVGA (320 x 240) TFT LCD that captures and displays high-resolution "electronic ink" under the pen tip for a natural signature.

The large signing area and rugged signing surface make this a versatile pad for the most demanding applications. Bundled secure software APIs provide for interactive text, graphics, and pen-tap hotspots and checkboxes which enable users to navigate screens, read agreements, and select preferred options before signing.

The SignatureGem LCD 4x5 MSR shows the signature on the signature pad, as well as the computer screen.

BENEFITS

- ✓ Large, rugged signing area for **long life**
- ✓ Full-color TFT VGA LCD display and attached MSR for **customization**
- ✓ High-quality **biometric and forensic** capture
- ✓ Topaz software suite bundled at **no additional cost** for complete signing and signature solution customization techniques
