

# TE1914

Exception Item Encoder

## Introducing the Most Precise, Productive Point-of-Entry Encoder on the Market, without exception.

Tellers continue to process large numbers of lobby deposits, counter checks and withdrawal slips. You must keep up with this volume without dedicating extra time and money to the task. At Data Financial, Inc. we know you're always seeking ways to improve the quality, efficiency and cost-effectiveness of document processing. We're looking to the future too. With Standard Register's TE1914, your tellers and support personnel can encode missing account numbers on internal documents in seconds — faster and easier than any competitive model. And they can do it virtually error-free because of the TE1914's refined user-friendly design, high quality ribbons and patented printing technology.

**Save Space and Labor in the Process.** The compact footprint of the TE1914 frees up room for other functions, improving customer service. Because ribbons can be stored and changed by your operators on-site, downtime is limited. By encoding at the teller station, you save time and money up-front — before items with missing or TE1914 Exception Item Encoder inaccurate account information reach your proof department.
